THE CATTLE DISEASE AT PORFU-LAM DAIRY FARM.

In consequence of the persistent attacks that have been made upon the Dairy Farm, at Pokiniam, and the discuisting, not to say startling, rumours that have been put in and at the present time a considerable circulation about the cattle on the Farm mendaciously fostered and hysterically promulgated by those who are not acquainted thad of combating pleuro-pneumonia at with all the facts, a representative of the China Mail paid a visit to the Farm the other day and had an interview with the leading herds having been slaughtered out manager, Mr J. Walker, regarding the recent disease in the stock. The Dairy Farm Company have had no desire to keep the real state of affairs from the public, and the manager at the Farm, Mr. Walker, had no hesitation

in talking about the matter. The first question addressed to Mr Walker was, 'Is it a fact that any of your stock were attacked by pleuro-pneumonia? Yes: but not to any considerable extent, was the ready reply.

Speaking apart altogether from this pleuro-pneumonia scare, what precautions do you take to prevent milk from sick cows

The milk from a sick cow is not used at all, replied Mr Walker. Immediately a cow's temperature becomes above normal, the milk from that cow is destroyed. There is less need for fear in regard to milk from cows affected by pleuro-pneumonia for the simple reason that as soon as a cow departure: became generally attacked by that disease the secretion of milk ceases completely. That is one of the best symptoms we have that an animal is

suffering from pleuro. I believe you have several breeds of cattle on your Farm. Was it amongst your newly-imported Australian stock that pleuro broke out ?

'No. It was amongst the American stock which has been on the Farm for at least two years in most cases for a longer period. We caused purchasing cattle from America about two years ago. None of the Australian cattle have been attacked. It is difficult to say how the pleuro was introduced to the Farm. My personal belief is that the germs were brought in by fodder from the Chinese mainland received during the winter menths.'

'Have you mixed the Australian cattle with the rest of the stock at Pokiniam? Some of our Australian consignments have been put into the sheds, but the last the last two months have been lo tate, nearly a mile distant from the Farm.

PRINCH ART TREASURES. Paris, March 18. French lovers of art are becoming anxious over the distribution of many priceless treasures in the past year among English, German and American collectors. The original gallery of General Hecquin: the Nanoleonic General, who sacked the city of Pavia, was broken up London and Berlin. The absence of any national reserve fund for the purchase of such treasures is much regretted. The annual subsidy allowed to the Government galleries is only \$30,000. It is breed that the unused fund of nearly \$2,000,000, the product of the sale of the crown lewels. be devoted to this purpose.
